## I-Switch: Optimize Your Shower Experience

极致淋浴体验

传统顶喷花洒多是单功能的，而多功能顶喷因使用不便而没有十分普及。

现在，I-Switch带来随心所浴的沐浴体验，仅抬手一挥就可完成功能切换。多档出水轻松选择，掌控你的淋浴体验，让淋浴变成一天中最棒的时刻。

Make your shower the best part of your day with Huale's I-Switch multi-functional shower head. With a motion detector sensor and temperature-sensitive LED lights, now you're always in control of your shower experience.

## Control with a Simple Gesture

智能手势控制系统

I-Switch 是革新的手势感应多功能顶喷花洒。“I”代表了智能控制系统，而“Switch”则体现了它的多功能。洗浴者抬手遮挡信号感应器就可以切换功能，实现不同的出水形态，任意选择密集雨淋、强劲喷雾、柔情气泡和畅爽瀑布，达到真正的Spa级沐浴体验。

I-Switch不需要洗浴者像操作传统花洒一样去踮脚旋转拨盘或者按压按钮，因而避免了在湿滑的洗浴空间摔倒。轻松扬手切换，就可以实现不同出水方式的瞬间转换，方便惬意。

We dubbed this shower head the “I-Switch” to emphasize both its intelligence (“I”) and its multi-functionality (“switch”). With a simple gesture, you are able to change modes so that you’re always in charge of your shower experience.

Huale makes it so easy to customize your shower experience so that every member of the family and any guests you may have can shower exactly the way they want to. No matter whether you want a powerful mist, a traditional rain, or a steady drop, you can change modes easily with a simple wave of your hand.

### Water-powered, No Batteries

水力发电，环保节能

水力发电，无需电池，更不用接交流电。无需因卫生间潮湿引起的短路而担惊受怕，绿色零耗电，真正零消耗。内置微型“水力发电站”，利用水流的动能，转换为电能驱动感应原件和Led。

Completely water-powered for a stress-free shower

The built-in micro hydroelectric generator can change the kinetic energy of the water flow to electric energy to drive the sensing component and LED.

No worry about the short circuit caused by the damp in the bathroom. Because the I-Switch is 100% powered by water, you don't have to worry about charging or replacing batteries.

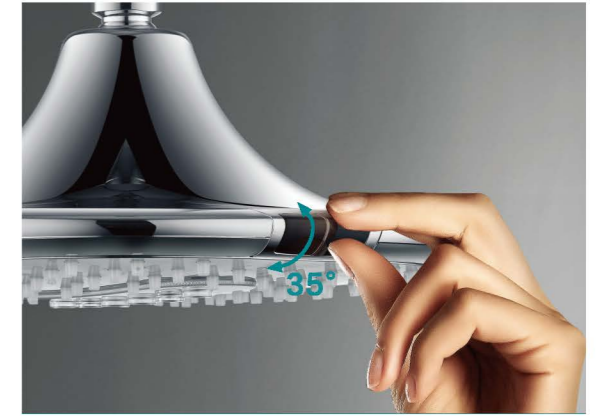

### A leader of High-quality and Healthy Showers

净无止境，高品质健康淋浴领航者

硅胶出水嘴，经久耐用不老化，轻松应对挑剔的肌肤，易清洁防堵塞。防水，耐腐蚀，环保材料，高品质生活，从I-Switch开始。优选工程高品质材料 杜绝二次水污染。

**排冷水接头**  
Auto Cold water  
Discharge Connector

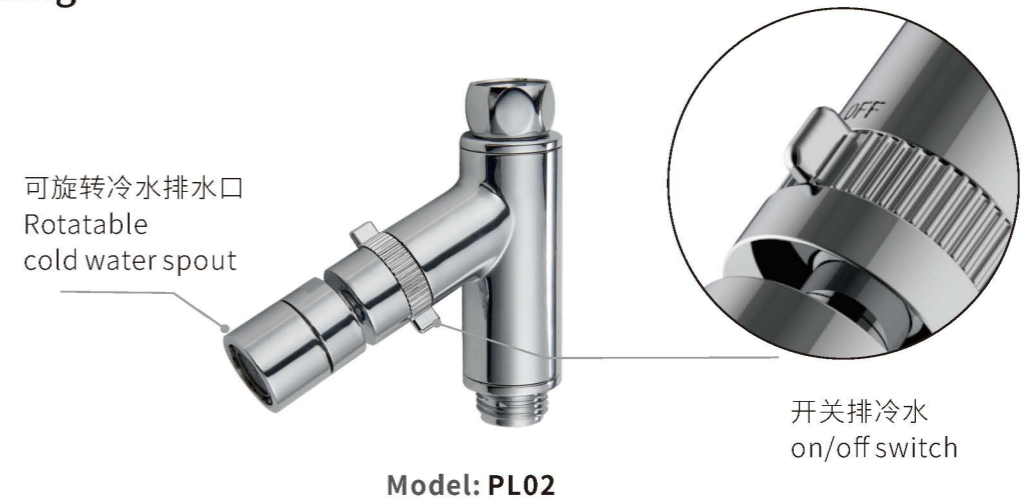

**自动排冷水, 温水时自动切换**  
Automatically discharge cold water  
Switch automatically when warm water

由于供水管道及花洒内在淋浴后都残留了大量的冷水, 每次开水洗澡, 都会排出大量冷水, 造成不适感。我们开创性地发明了排冷水结构, 在每次洗澡前, 自动感应水温。当低于35°C时自动从排冷水出口排出, 排水口可旋转到远离沐浴人站立的位置。水温变暖时候, 水路自动切换到淋浴水路从花洒喷淋出。避免了被花洒喷出的冷水打一激灵的狼狈, 也让你每次洗澡时候更从容省心。如果夏天的时候需要洗冷水澡, 可以转动旋钮开关关掉排冷水功能。

Since water remains in the water supply pipe and the shower after taking a bath, a large amount of cold water will be discharged every time before a bath, causing discomfort. We groundbreakingly invented the cold water discharge structure, which automatically senses the water temperature before each bath. When the temperature is lower than 35°C, cold water will automatically be discharged from the cold water spout. The spout can be directed away from the position where the bather is standing. When the water temperature becomes warmer, the waterway automatically switches to the shower waterway to spray out from the shower. It avoids the embarrassment of being hit by the cold water sprayed by the shower, and makes you more relaxed and worry-free every time you take a bath. If you need to take a cold shower in summer, you can turn the knob to turn off the cold water discharge function.
